Why Design Instruction? vii

Instructional Design Pretest xi

STEP I: Define Objectives
- Overview 1-1
- Step I Objectives 1-2
- Efficient Design Checklist for Step One 1-3
  - Exercise 1: Define Your Business Objectives 1-4
  - Exercise 2: Identify Measurable Results 1-5
  - Exercise 3: Define Supporting Results Objectives 1-17
- What Performance Will Get The Results You Want? 1-18
  - Exercise 4: Job Analysis Worksheet 1-19
  - Exercise 5: Task Analysis Worksheet 1-20
  - Exercise 6: Labeling Actions, Conditions, and Effects 1-26
  - Exercise 7: Training vs. Performance Conditions 1-35
  - Exercise 8: Editing ISO 9000 Objectives 1-37
  - Exercise 9: Editing Performance Improvement Objectives 1-40
  - Exercise 10: Editing Safety Objectives 1-44
- Defining Component Objectives 1-48
  - Exercise 11: Defining Component Objectives 1-49
  - Exercise 12: Group Projects 1-51
  - Exercise 13: Individual Projects 1-52
- Job Aid: Performance Objective Template 1-53

STEP II: Identify Deficits
- Overview 2-1
- Step II Objectives 2-2
- Efficient Design Checklist for Step Two 2-3
  - Exercise 1: Identify Results Deficits 2-4
- Content Analysis 2-5
  - Exercise 2: Content Analysis 2-12
- To Identify Performance Deficits, You Need To Develop a Valid Test 2-13
  - Exercise 3: Editing Test Questions for Switch Capacity Program 2-15
  - Exercise 4: Editing Test Questions for a Performance Improvement Program 2-19
  - Exercise 5: Editing Test Questions for a Vocabulary-Building Program 2-25
  - Exercise 6: Draft a Valid Test for a Performance Objective 2-29
  - Exercise 7: Identify Your Performance Deficits 2-32
- Best Performance Pie 2-33
  - Exercise 8: Selecting the Appropriate Intervention 2-34
  - Exercise 9: Analyze the Cause of Your Performance Deficits 2-38

STEP III: Create Training
- Overview 3-1
- Step III Objectives 3-2
- Efficient Design Checklist for Step Three 3-3
- Efficient Design Features: Editor's Checklist 3-4
- Features of Efficient Training Programs 3-6
  - Exercise 1: Editing Frames from a Safety Training Course 3-20

Exercise 2: Editing Frames from a Performance Management Course 3-27
Exercise 3: Editing Frames from a Faucet Assembly Course..... 3-60
Exercise 4: Editing Frames from a Vocabulary-Building Course..... 3-67
Exercise 5: Editing Frames from Various Courses..... 3-79
Exercise 6: Sequencing Your Training Objectives 3-85
Exercise 7: Draft Training for a Performance Objective 3-87
Exercise 8: Create a Training Program 3-94

STEP IV: Evaluate Programs

Overview..... 4-1
Step IV Objectives. 4-2
Efficient Design Checklist for Step Four..... 4-3
To Evaluate by Inspection 4-4
How to Ensure Quality Control 4-5
Exercise 1: Evaluating Quality Control Procedures..... 4-6
Exercise 2: Evaluating Vocabulary-Building Programs..... 4-9
Exercise 3: Evaluate Programs by Inspection..... 4-16
Job Aid: "Evaluate Your Training" Checklist 4-17
Outcome Questions 4-20
Exercise 4: Analyzing Customer Satisfaction Data..... 4-21
Exercise 5: Analyzing Practice and Posttest Data..... 4-23
Exercise 6: Analyzing Outcome Data..... 4-25
Exercise 7: Interval and Ratio Charting 4-29
Exercise 8: Evaluting Learning Achievement and Training Efficiency..... 4-36
Exercise 9: Evaluating Fluent Job Performance..... 4-66
Exercise 10: Evaluating Business Results..... 4-68

Appendix:

Instructional Design Posttest A-3
Efficient Design Checklist A-5
