Digger Derrick Operator Training

Digger derrick operators need a wide range of skills and equipment knowledge to competently and safely dig holes, set poles and lift loads, especially around energized lines and equipment. "Basic Training for Digger and Truck Mounted Crane Operators" -- a manual from the Institute for Safety in Powerline Construction (ISPC) -- is a newly developed,

comprehensive tool that will become a reference guide for digger derrick operators throughout their careers. [Read More](#)

Electrical Worker Training

Vivid Learning Systems has updated its Electrical Worker Training 1910.269 library with a new and larger lesson template. In addition, Vivid has amped up the 1910.269 lesson library and the utility best practices lessons with new high-resolution photos. The lessons, viewed regularly by Vivid's subject matter expert with more than 40 years of T&D experience, are portable and can be uploaded to fit existing e-learning systems. [Read More](#)

Safe By Accident?

In "Safe By Accident? Leadership Practices that Build a Sustainable Safety Culture," workplace behavioral safety experts and authors Judy Agnew and Aubrey Daniels deliver a much-needed solution to the recent upsurge in devastating workplace disasters. Moving beyond finger-pointing, the authors reveal how behavioral science, specifically behavior analysis, can help safety professionals and leaders eliminate counterproductive practices and foster a company-

wide culture of safety. [Read More](#)

Wireless Data Management Solution

eData Collectors, Inc. offers a paperless, wireless data management solution that is great for inspections, walk-throughs, service routes and much more. The system uses eData Tags™

that, when touched with an eData Collector™, capture vital project information. The eData Catcher™ is customizable to increase productivity and data management. Data is wirelessly downloaded, correlated and sorted into customized reports. [Read More](#)

Durable Stringing Line

Unitrex XS Max Wear by Yale Cordage is the most durable synthetic stringing line ever produced. Unitrex incorporates a UHMPE core of Spectra fiber, supplying very high strength and very little

stretch. Yale's .69 Unitrex has strength of 50,500 pounds as compared with polyester at 16,000 pounds, and is more like wire rope than synthetic. Unitrex utilizes a patented rubber layer to keep moisture from the core, supplying excellent dielectric strength and rope longevity. [Read More](#)
